

Construction Next Door

Preble Shawnee High School New Main Security Entrances

Project:

Preble Shawnee High School
5495 Sommers Gratis Rd.
Camden, OH 45311

Owner:

Preble Shawnee Local Schools

Energy Professional:

Energy Optimizers, USA

Architect:

SHP Leading Design

Highlights:

- Capitol 245TFS Storefront
- Capitol 500 WS Doors
- 1" clear low-"E" laminated insulated glass
- Dark bronze anodized finish
- Coordination with masonry and access controls contractor

Masonry contractor cuts and preps two openings into the existing brick walls. The new interior opening is boarded up. Opening dimensions are always guaranteed or verified in field prior to manufacturing to ensure a quality fit.

Capitol installed the prefabricated storefront framing first. Then, the new Capitol wide stile doors are installed along with all remaining door hardware. All laminated Low-"E" insulated glass units are then glazed into the doors and framing.

During installation, all work is coordinated with access controls contractor for security hardware and final electrical hookup. Finally, all glazing and framing is wiped down clean and final caulking is completed. The new main entrances are ready for occupant use.
