

245TMP Series

2" x 4-1/2" Multi-Plane Energy Efficient Thermal Aluminum Storefront Systems

Capitol 245TMP Series (multi-plane) storefront systems are 2" x 4-1/2" thermally broken framing systems for interior or exterior use. These storefront systems greatly reduce conductivity and minimize air and water infiltration, while delivering structurally superior performance capabilities. Integrate a Capitol entrance system with front, center, or back set storefront options to enhance any building's design and aesthetics. Screw spline assembly is standard with shear block assembly available.

Features & Benefits

- Accommodates 1/4" to 1" infills that can be front, center, or back set
 - maximize energy performance while creating a unique flush look
- Pour and debridge thermally broken framing systems extruded from 6063-T5 aluminum alloy
 - structurally superior performance with low thermal conductivity limiting climate transfer
- Pair with a Capitol entrance and/or operable window inserts
 - maximize the functionality and look of your building
- Water deflectors accommodates internal weep
 - prevents moisture penetration, directing all water to the sill for drainage

Options

- Panning, snap trims, and multiple corner posts
- Interior blind sash with 5/8" integral blinds and blind knob or flush plate custodian access control
- Internal or surface applied muntins
- Door framing components
- Operable window units
- Variety of anodized and painted finish colors
- Light shelves
- Can be fully fabricated, fabricated (KD), or provided in stock lengths with accessories
