CAPITOL Aluminum & Glass
Window & Door Specialists

PROJECT SPOTLIGHT

Bright Futures Begin At Bellevue Elementary School

SUSTAINABLE DESIGN FOR A STRONG START

For the new Bellevue Elementary School, Capitol Aluminum & Glass worked with Adena Corporation to manufacture and install architectural aluminum windows, doors, storefronts, and curtain wall systems. Durable aluminum framing and Low-E insulated glass help create bright, welcoming spaces for young learners while supporting long-term performance. The completed school achieved LEED Silver certification, reflecting the project's broader commitment to sustainable design.
