Window & Door Specialists

PROJECT SPOTLIGHT

New Life And New Space At Clyde High School

ARCHITECTURAL GLAZING THAT BRINGS IT TOGETHER

Clyde High School gained a fresh look and room to grow through the renovation of its existing building and construction of a new addition. Working with Mosser Construction, Capitol Aluminum & Glass manufactured and installed architectural aluminum and glazing systems that help tie the renovated and newly built spaces together. Coordinated framing creates a consistent architectural appearance, while generous glazing brings natural light indoors. Durable aluminum construction supports the demands of everyday school use. The project achieved LEED Silver certification.

PROJECT TEAM
